I am totally against irradiation of the food supply. Nonlabelling of irradiated food conjures up a sense of hiding harm done by the irradiation process. Much is known about the dangerous neuclor wastes Cesium 137-Colbalt 60 use to destroy food. Noticeable labeling gives the public their rightful choices.

A healthy lives endure on food; Safe from chemicals anddrugs, Live grown free of chemicals and drugs, Nutritious as the Creator intended for soil, plants, animals and people.

Government is elected to uphold and preserve health laws that ,seemingly, are on a leash by multiple corporations. Truly, democracy undermined by democracy, a run away technology that has caused horrendous health problems, suffering never before encountered, statistics unaccountable and a continued burden now and in the future economically and financial.

Aggressive effortlooks at the protection of the open pollinated seed stock is a future life line for food. Hybrid-Chemical produced seed can revert back to many undesirable triats.

Sincerely
Eleanor Reth
